Subject: AQS Beta Test Participants

Just a brief note to thank you all for participating in the AQS beta test program and to share some information with you.

So far, 19 State and 4 local agencies (Indianapolis, IN, South Coast(LA), CA, Pima Co.(Tuscon), AZ, and San Diego, CA have successfully accessed the new AQS application. In addition, 36 State air agencies have installed SecuRemote. These agencies are shown in the attached maps. We appreciate your efforts as well as your patience with the set-up process.

We are planning to hold a conference call with interested beta testers later this month to get feedback on your experiences with the system. The call will likely be in the last week of March. We are aware of a few more agencies in the process of accessing AQS and we would like to give them a little time to explore the new system before scheduling the call.

Once again, the AQS reengineering team would like to thank each of you for participating in the beta test program. We appreciate the time you have taken to become familiar with the new system. Thanks again.

Ed Lillis
